Washington has, during all this time, been grow-ing stronger financially, commercially and po-littically. It has gained an envisible reputation. His resources have been exhibited and its capa-bilities have been made known. Its shillity to as-sume the responsibilities and bear the burdens of statchood is far greater now than at any time in the past. Already it outranks several other states of the Union in population, and wealth, and is nees-ling forward with giant strides to that high posi-tion which it is destined to occury. TAGOMA, Wash, Nov. 16, 1889.
Homorable Miles C. Moore, Cheirman Invitation Committee, Olympia, Wash: Bear Sir—I am just in receipt of your telegram, inviting me to be present at the hangural exemonies on Monday, and very much repret that business engagements will prevent me from giving myself the gratification of beholding this great commonwealth become a member of the American Union. It is a memorable event, not only to those who know its injuncy and its growth, but to those who know its injuncy and its growth, but to those who know its injuncy and its growth, but to those who know its injuncy and its growth, but to those who came afterward and raised it to manhood. Its tuture is illimitable, The great conquering ruce must thicken here as it did on the western above of the other continent before the discovery of America, and here it will put forth its supreme effort, making of Washington the greatest sate of modern history. Thogrand cycle has been completed, the record of utmost daring has been summed up. The earth has yielded its submission, and now the invincible race will govern with its ideas the world it has circled with its arms. All hait the state of Washington, the pecificas outcome of the listest time! I love her with the affection of a child, and I glory in her strength and her beauty. May the fates amile upon her forever, and may the happiness of ker free people be bright and complete like the bow of promise.

THE GOVERNOR'S RECEPTION.

A Magnificent Affair Attended by All Classes of Washington Scolety.

The governor's reception at Columbia hall tonight, was no doubt the event of the day, in the
eyes of the fair sex, both at home and those from
abroad. Many of the schators and representatives, and all the state officers who attended, were tives, and all the state officers who attended, were accompanied by their better halves. A great many Seattle and Tacoma ladies were in the city, and of course the chief liem of interest in all this day's important proceedings, with these many ladies, centered around the reception and ball. The hall was tastefully ornamented with flags and streamers. The stage had been converted into a tented field, and a ten-pounder on wheels had guard over the bivlouac. The hackground represented a vest forest, and a lone sentry paced to said fro, keeping faithful guard. The guests began to arrive early and by 3 o'clock the large hall was crowded to the doors.

Thomas H. Brents stood around the stove, as though it was cold, and perhaps the genial and kindly Tom did feel the cold.

Adjutant-General O'Brien and staff walked through the hall in a body, with the clank of swords, jingling spurs and a firm soldiery bearing and paid their respects to the governor and state officers. Judys Wingard and wife, a motherly little lady, wandered around among the visitors and culoyed themselves immensely. Honorable D. F. Percival, of Spokane county, an old time legislative war horse, boomed head and shoulders above the crowd, calmly taking in the scene. There was Senator Fairweather and wife, Senator Whalley and various and numerous legislative and political notabilities.

The Inspiring delictous music, the Inuphing and chatting groups of handsome ladies and elegant, manty-hocking gentlemen, the gay flags and streamers, flushing eyes and sparking jewels made the scene in this far Western outpost, one long to be romembered.

Among the many hamdsome dresses worn by the ladies present the following were the most notable and elegant:

Judge Langford then invited Judge Upton to a seat beside him on the bench which was accepted. Mr. Clark after presenting the credentials of Judge Upton in fitting and eloquent language presented Judge Upton to the bench and bar. Judge Langford evidently affected by the proceedings and situation, said: "I have been upon the bench for four years and have attempted to maintain a respect for the law and the honor of the bench. Consectors that in the multitude of different decisions rendered, I must have made some mistakes, I am much gratified that there has been so little of disapproval and so much of approval of my official soiton. I am thankful to the bar and the people for this and hope that they will continue to learn that as man's wisdom increases he mistrasts the correctness of his own opinions and gives more evidence to the possibility of himself being in error." After which he arose and passed from the room.

Judge Upton responded, and said be felt most deeply the importance of the position and the honors it conferred, and, while thankful for the latter, would not forget his duty as a judge or his responsibility as a man to his fellows and his Maker, and would, with God's help, deal impartially and equitably between man and man, and asked the indulgence and assistance of the bar in his desire to do equity, and in adjusting- and assimilating the difficulties that would, arise between the old and new order of affairs.

SEPARATE ELECTIONS DECIDED ON

Soldiery. NELSON BENNET NOT A CANDIDATE

Surprising Confidence of Each Aspirant-Allen's Election Generally Conceded-The Squire Forces Hopeful for Their Leader.

OLYMPIA, Nov. 18.—It is the night before the senatorial battle. The opposing armies are camped on the field. There is confidence at the headquarters of each candidate. The pickets have been posted and the battle ground is being put in readiness for the storm that will break when at noon to-morrow the presiding officers of the separate houses will announce the arrival of the hour for the taking of a ballot. There will be a great deal of altimishing, and possibly some changes between now and the time the ballot is taken. The indications are to-night that Watson C. Squire and John B. Allen will be the successful candidates. Allen's election is conceded by all excent Turner and Brents and their cluse friends. Some of their men have already giving up the fight. General Sprague says that Allen will be elected. Squire's decition is not so sure as Allen's, because a harder fight has been made against him and his forcer have not been so well organized as Allen's. It has been Allen and Squire against the field, and they have won. Squire is sure of fity-accent votes on the first ballot, and Allen sixty.

Here is about how the vote will stand: For Allen: In the sente—Austin, Clouch, Fairweather, Farris, Forsythe, Hyde, Kinnear, Landes, Lawrence, Long, Luce, Froston, Parkinson,

Non-committal in the sensite: Luce.
This computation was made by a man who has
lone work for Thompson and has had occasion

to interview many members of the legislature, the does not claim the victory for Thompson, nor does he concede it to Squire, but strikes a happy medium and holds that the west side senatorship is within the greap of Pierce county if she will only reach for it.

The workers are hard at it to-night, and the Carlion house lobby and the senatorial head-quarters are full of life. A rear deal of button-holing is being done. Vigorous onalaughts are being made on the Allen and Squire ranks to-night, and their flustemants are everywhere keeping the line solid.

Nelson Bennett and John H. Mitchell, jr., son of the Oregon senator, arrived to-day from Tacoma, and immediately the story got put that Thompson and Sprague would withdraw in favor of Bennett, whose candidary would be backed by Northern Pacific gold. Another yarn was that Bennett's mission was to make the election of Equire or Thompson or Sprague an impossibility, and push John F. Gowey, of Clympla, to the front.

Mr. Bennett was bunted up and questioned, "I am not going to be a senatorial candidate," he said. "I am here to work for Thompson."

"Are you doing anything for Mr. Gowey?"

"It is charged that the Northern Pacific is putting money into the senatorial fight. Is that true!"

putting money into the senatorial fight. Is that true!"
"I do not know; I have not been connected with the Northern Pacific for two years."

The bone of contention to-day has been whether the legislature will yote for one or two senators at a time. It is the general naderstanding to-night that but one senator will be elected at a time and the East Side sonator will be the first yoted for.

The Allen men came to a conclusion to-day to yue for their man first, last and all the time, regardless of the number of emiddates in the field or the manner of election, whether double or single.

or the manner of election, whether double or single.

The Brents, Thompson and Turner people have gotten out a circular headed, "A Dangerous and lilegal Proceeding," which is in opposition to liking a vote on more than one senator at a time. They say that to vote for two senators on one rolicall is in flat violation of section 15 of the Revised Statutes of the United States, as by so doing three persons may receive a number of voters equal to a majority of the membership of the joint assembly, and if such body is composed of an even number of membership of the joint assembly, and if such body is composed of an even number of membership of the joint assembly, and if such body is composed of an even number of membership of the joint which we will be enough surplus votes loss only four, or if an odd number, enough less only two, to give such majority to a fourth person. To illustrate this filegal method the re ult of a vote in the bouse for instance might be as follows: Suppose the sensorial candidates to be A B C D E F. six candidates in number. Allen votes for A B, Bird for A C, Bischum for B C, Bisch for A C, Bisch for B C, Ctark for A C, Bisch for B C, Ctark for A C, Bisch for B C, Ctark for A C, Bisch for B C, State for B E, and so on. In this manner the whole vote in the house figures up as follows: A S6, B 26, C S6, D 19, E 8, and F 5, and three candidates will thus have a majority in the house. In the lower and sonic them are reto three candidates will thus have a majority in the house. In the house and senate there are 210 votes, and the same ratio of votes for each candi-

date would give three senatorial candidates a majority, and would create confusion. This fact, which would appear on the surface an utter im-possibility, is demonstrated to be a mathematical fact. An Illustration Showing How Three Can-didates Could Earl Receive a M Jurity. OLYMPIA, Nov. 18.—The question as to whether the two United States senators to be elected by the first legislature of Washington shall be balloted for separately or both at the same time is still the subject of considerable earnest discus-

sion. Section 15 of the Revised Statutes of the United States provides:
"Each house shall openly, by viva voce vote of each number present, name one person for sens-tor in congress from such state, and the name of the person so voted for who receives a majority of the whole number of votes deat in each house

shall be entered on the journal," etc.
The Chagonian correspondent interrogated
several prominent republicans on the subject,
and from one of them elicited the following state-

several prominent republicans on the subject, and frots one of them elicited the following statement:

"This law, it is true, was made in contemplation of there being but one vacancy at any one time to be filled; but it is the only law governing the matter, and it must be and is controlling. It agraeach member abail "name one person for senarcy, of the letter of the law, and it is easily "mane one person for senarcy, of the letter of the law, and it is easily "mane one person for senarcy, of the letter of the law, and it is easily "mane controlling. It agraeach member abail "name one person for senarcy, or the latter of the law the latter of the law in the letter of the law and it is easily dischard for senarcy ackney, that he will press his choice for the second vacancy. Then, if Junes is defeated for that vacancy, of the has the right to cast his vote for Jones to fill the other vacancy.

"The voting io fill both vacancies on one ballot must lead to one of two absurdities: Each member may vote for the same man twice, or he must be depired of his right, if he fails to get his choice for the first vacancy, of voting for him for the second."

"Another and conclusive fact, showing that congress could never have contemplated balloting one time to fill two vacancies is, that by that means three men may be elected to fill two vacancies. The law says that the man receiving a majority of all the votes in the legislature shall be elected. Filty-three votes are a majority of all in votes in the legislature shall be elected. Albany has given more assistance to outside enterprises than all and the Oregon combined.

feelve additions have been made to Albany and over five hunmildings erected during the past year.

Albany has a street railway system and the most complete electric light works in the state, its dynamos furnishing more lights than all the other cities of the valley combined.

Look at this array of improvements for the year (Soo: With a population of over 10,000 there will be built at Albany large smelting works by Eastern capitalists, a 4-story brick hotel; a 3-story brick block, to be occupied by railroad offices; largest hospital in the state, to be crected by the Sisters of Charity from Emmitsburg, Md.; a paper factory, gas works and numerous other smaller institutions necessitating an expenditure of nearly \$1,000,000.

Besides these, the car and machine shops, round house and other buildings for the western division of the Oregon Pacific Railroad Company will be erected here.

INVESTMENTS ARE SAFE

Returns are Sure!

The largest and best woolen mills in the state are being built, and the machinery, which is the latest improved, will be started about Jan. 1. Albany has 32 manufacturing establishments, which does not include the Grant's Pass sash and door factory, with a capital stock of \$150,000, soon to be removed here.

For next season plans are already being drawn for the erection of thirteen fine brick blocks, which will include some of the finest. buildings in the state.

The records will show that over one million dollars of real estate transfers have been made in Albany within the past ninety days, equal to all other: Willamette Valley cities combined.

Nearly one-half mil ion dollars of real estate have been purchased by New York Capital str. who are also interested in the Oregon Pacific Railroad.

Albany has the finest banks, has numerous and good schools, two kindergartens, thirteen churches, substantial public buildings, splendid water works, supplying water direct from the Cascade Mountains, excellent sewerage, a social and hospitable people, rail and water communication with the markets of the entire world and is rapidly increasing in wealth and population.

Are going with a rush now. Never before have we chosen such a captivating assortment; the styles are irresistible, and so are the prices. Such goods as you see on our tables never touched low water mark prices, as they do this season. We bought largely and carefully, and we propose to sell the same way.

SPLENDID VALUES OFFERED

AT \$28, \$25 AND \$30.

If you have not, is it not time you were giving your attention to a matter that is so important? It may not be a great outlay of money, but as it will be something you ll wear all this winter, and maybe next, it's worth a little study.

It's not a very hare matter to decide on how much you may wish or can afford to pay for a Suit or Overcoat. Unfortunately for some of us, it's a question of whit we can afford, while with our next door neighbor it's only a matter of how much he chooses to pay.

The expense matter being decided the next question is, "Where shall I go to buy my clothing?" This is purely a matter of choice. We think that we can make it of mutual benefit to yourself and us to buy your Clothing here.

We are very particular in our buy-ing, realizing that "a garment well bought is half sold" Low, medium or high-priced clothing, we buy only of the best manufacturers. We can-not afford to sell Clothing made for show. The customer of to-day we expect to sell Clothing for the next 25 years, and can only do so by selling him goods on honor.

Our business in Portland has grown to immense proportions, so much so that with our ncreased trade we can afford to sell goods at a very small profit. Our entire fall stock is

PORTLAND, TUESDAY, NOV. 19

SHALL WE OPEN THE WAY? There is widely diffused throughout Ore-

con a very mean spirit which manifests atself in expressions of discontent and envy whenever it is reported that individuals or coalities are growing in we ith and pro perity. An old fogy notion prevails that whatevers gained in property and pros-perity by an individual or by a locality is exrongiuily taken from other undividuals or er localities. Hence there are t gough ont Oregon great numbers of persons whose thoughts are mainly employed in endeavors to prevent others from making money ambling if others do make money prombing it others to mines more, motion that no person or place can make money except at the expense of some other person or place, is one of the characteristics of old Oregon Hence an active energetic and prosperous man is regarded as a public enemy, and a prosperous and progressive sown is denounced as a rendezvous of rob-

bers who are getting rich off the unrequited

ndustry of the country

This spirit manifests itself both in legisla tion and in the administration of the laws The study is low to prevent anybody from making money, how to prevent towns and cities from growing in wealth and prosperity Hence a system has been adopted which keeps investments out of the state deadens enterprise, and sends capital for investment to the states and territories around us Notice is given that we do not want money brought here for investment. Our usury on the one hand and our system of tax ing the evidences of indebtedness on the other sistes as if we had it in our power to make and enforce laws expressly devised for that very thing Wachington pursues a more liberal and enhightened course. Sho does not meet and repel capital with a does not meet and repel capital with a usury law and with taxation of the evi dences of debt, and herein is the chief rea son why she has been getting vast sums of outside capital, while Oregon has been get-

ting almost none
When money can be freety invested the result always stimulates industry and promotes the general prosperity. It opens in numerable avenues to business an I labor, it sets up factories, builds cities, maker a market by factories, buttus cities, makes a market for the products of agriculture onems mines, develops the wealth of forests, cre-ates activity in real estate, in a word, it makes an active, energetic, progressive com-munity Of all this development in every new country, borrowed capital is largely the foundation; but money will not be lent where the evidences of the debt are taxed n four times in excess of the taxes im posed on property in tangible and visible forms. This places a check upon business in every branch and department, it with holds employment from labor, it freezes up

all the springs of enterprise and prosperity A letter in the Folk County Remizer, here-perer mentioned in The Oragovian, conthins this remark. "It is strange how wealth squarms under baving to pay its just portion of the taxes of our state" Wealth is not equirming at all. It is able to take care of stack Capital can avoid and does avoid a state wherein it is dealt with on prin pies so natrow as those that prevail it goes where people have sense enough to allow it an open field and the consequences are ammonsely beneficial to the community at large. In fixing a policy designed to pro-west anybody from making money in Orc gon we keep out capital from other states and give the few capitalists who are here and give the few capitalists who are here and understand the situation opportunities for immensely increasing their wealth and absorbing greater and greater proportions of the proceeds of the industry of the state Every man who has lived long in Oregon knows perfectly the methods of escaping taxation, but the newcomer who does not know them stid carput, practice them. know them grid cannot practice them will not lend or invest in a state where the ditions seem to be so greatly against him The plea for the repeal of the usury and

mortgage tax taws as not an appeal in behalf of the wealthy class, but an appeal in behalf of the industry and beamers of the star It is a plea for the investment of money

from abroad a plea for stimulation of the

energies and development of the "esources of Oregon a plea for results which for from adding to the burdens of the poor or the state of the butters of the poor or those of moderate means, will, on the con-trary, pring about a state of things highly favorable to the properity of all, and es-pens ly of the working classes and of per some of small property. Have we not had enough of the results that flow from the resent policy of narrowness, exclusiveness stagnation, atrophy and general unpro-gressiveness? We want to 'get a move on Oregon,' yet we shall mot get it until we are willing that money shall be invested on terms that will make money here. The more money made here the better, the more men of wealth and enterprise we have the better the rewards the higher the prosperity of the industrial masses. It is pitiful indeed to be obliged seriously to combat the notion that increase of the wealth of individuals or of localities can only be attained by robbery of others and to reflect that we have in Oregon a system based on the supposition that it is go for the people at large to try to prevent indi The state that allows free move ment of money and does not tax evidences of debt shows an intelligence that assures to It a career of boundless activity and pros-parity Such a career is opening to Wash bars that ignorance and hitleness have erected will have very effectually closed such a career against herself

point The train was detailed but none of the
passengers were injured. The engine jumped
the rail while passing through snow shed No 2,
which was entirely destroyed. The accident was
witnessed by accyclal parties in Union and
immediate preparations were made to assist o issue certificates against the unknown which and the propositions it is unknown which the issue of the secretary intends to recommend the issue of the secretary intends to recommend the issue of the secretary in the secretary subord hate propositions it is unknown whether
the secretary intends to recommend the issue of
certificates at the colunge value of silver bars,
or at their market value whether
they are to be redeemed at the
comage value of silver, whether the new
series of certificates shall circulate co-ordinarily
with the old, or whether the latter are to be with
drawn. It is barely possible that Windom a plan
of treating silver may embrace the issue of silver
but lion certificates. This idea is by no means a
new one, but the secretary is said to have a some
what complex, though novel, method of devel
oping it, with which he wishes to surprise the
fir anchal world.

Some of the less important reasons for the issue

witnessed by several parties in Union and immediate preparations were made to assist if necessary A relief party started out and the physicians were summoned to be in read incess if their services were required but on the arrival of the relief party at the wreak it was found that no one was birt and that the train was only derailed Considerable of the crockery in the dining car was denolished but the passengers, with great presence of mind retained their seats making no attempt to leave the cars it will likely take secural hours to get the train on fit ancial world

Some of the less important reasons for the issue ing of certificates against the builton purchases of the government are that the expense of transportation would be lessened, that the expensive recounts of the immense number of silver dollars about a small percentage of the silver dollars already coined are to actual circuiation, it would be futile to keep on coining them and that by having all yer in bars the government could more readily sell it for manufacturing purposes.

It is probable although it can not be officially scats making no attempt to leave will likely take several hours to get

sell it for manufacturing purposes.

It is probable, although it can not be officially confirmed, that Windom intends to recommend a considerable increase in the monthly purchases of silver, and to satisfy those who fear a future increase of depreciated currency by issuing currency on a basis approximating the market value of silver that is to any a certificate dollar shall represent not the silver dollar of 412½ grains, but a quantite of silver that would bring \$1 in the market This would perhaps be a dollar of between five and six hundred grains.

Secretars Windom's attention was called this Narrow Fscape From a Frightful Disaster in Ionus Ivanis

Pittsen Nov 18—The limited mail on the Western Ponnylvania ran into a landslide neur Bessemer last night. The engine and buggage car were wrecked Pitteman John Good was fatally injured. The engineer was badly hurt but will recover. Had the engine fallen to the right instead of to the left the entire train, with its load of 400 souls would have gone down an embank ment 100 feet high.

Secretary Windom's attention was called this evening to the report that he had decided to with draw \$47,000,000 of the public funds now on denosit with the national banks. The secretary said draw 437 000 000 of the public funds now on de posit with the national banks. The secretary said that he certainly did not propose to make any such wholesale withdrawsi, but that the question of the withdrawsi of a portion of the fund in the depository hanks had been under consideration for some time, and that he fully recognized the necessity of calling in such portion as could be withdrawn from the banks without serious in convenience to trade and commercial interests as early as practicable. While he thoroughly disappoved of the policy of deposits in banks in each of the policy and the proposed of the policy of deposits in banks in each of the month of the policy and the fully appreciated in the policy and the policy of the policy of the policy of the policy of the policy and the fully appreciated in the policy appreciated the information of proceeding in a careful and sonservative way it making the withdrawals. The secretary said that the withdrawals when made, would be for the sole purpose of reinvastment in Cuited States bonds. He said also that the government for many years pust has had on deposit with the besievs through which its current business is transacted 250,000,000, and he saw no good reason why this policy should be changed.

Their Stand on Public Questions—Working
Together for the Common Good.

Washirsoros, Nov 12.—The members from the new Aurithestern states got together to day all being present except Mr. Gifferd, but hispor Hick for spoke for bim and other members who had seen him stated that he was in accord with the purposes of the meeting. As far as everything was considered they agreed.

The various interests of the West were taken up and considered, and there was an unnimous sentiment in favor of the following propositions. Unlimited or largely increased silver coinage, the imposing of a duty on all lead oxes, whether mixed with silver or not, protection by tariff on every agricultural product, protection of the sheep industry, restoring the duty on hides, the reduction of the fariff on sugar and rice

They further were unanihous in agreeing to ask representation on leading committees, the following being named as desirable. Birer and harbors, mines and mining, territories post infollowing being named as desirable. Birer and harbors, mines and mining, territories post offices and post roads public lands, and Indian affairs to case a committee on irrigation is appointed they ask representation upon that. They will also demand that the experiments began by the government in irrigation be continued, and that a system of reclamation and preservation of western lands be devised.

They agreed that it would be best to act as unit in all matters where it was notable.

western lands be devised.

They agreed that it would be best to act as a mait is all matters where it was possible. When the speakership was mentioned everybody sat atil and gazed away from his neighbor. None of the members fell like committing themselves. They all were of the opinion that it would be a good thing if they could vote as a unit on the question, but as it was almost a certainty that they were not agreed now the matter was deferred. The meeting caused considerable comment among the members and others interested in coming legislation.

WAS LOUIS MARS MURDERED!

Railroad Gossip-John Case Indicted-Last Hght's Barquet-Back From Florida-Telegraph Notes-Other City News.

As the defendant was not represented by counsel, he was given further time until this morning to enter his ples. The case will be disposed of as quickly as possible. District Attorney McGinn will move that the case he set for trial at as early adate as Judge Staarne's calcudar will permit, say December '3. This will give Gibba's counsel were a month to propare for the defense. It may be, however, that the court calendar is filled until early in January, and in that event the trial can not be had until that time, unless some other cases are set aside.

Tot be had until that time, unless some other cases are set aside.

The police department was considerably stirred up yesterday over the exclusive interview given THE OREGORIAN by Gibbs. They claim that he was not under the dacks as Gibbs claimed. This may all be so, but what THE OREGORIAN published was Gibbs's statement verbailm. The re-porter interviewed the prisoner immediately on his arrival in jail, before he had seen an attorney. Later in the day he saw a lawyer, who told him under no consideration to talk about his case to a reporter. This warning was too last, however, as far as THE OREGORIAN was concerned. Later in the day two other reporters essaved to interview Gibbs, but he refused point blank totalk to either of them. Yesterday the operation was repeated The prisoner has told his whole story and it was published yesterday morning. So, until the trial takes place, nothing of a very interesting character can be expected to develop in regard to this case, unless Gibbs attempts suicide, and he is regarded as being too much of a coward to do that. ness below the lower cascanes, on the Waspington side, was found dead in a field back of his louis several days since. He had been shot, and was found with his gun lying across his breast. One barrel of the gun, which was an old shotgun, was discharged, and it had evidently been placed scross the body to give the impression that Marhad shot himself. It is supposed that the old manufact once money by him, and that he was merchad and once money by him, and that he was merchad once money in the paide down.

Two mad who have been camped near the place are suspected of committing the murder, as they disappeared on the day it was committed, the boat in which they crossed the liver having been found where they left it. The matter has been found where they left it. The matter has been kept quiet in hope of securing the murderers. It is said that in addition to the gunshet wound there is a hole made by a rike bullet through the body.

The murder of Mr. Newcastle occurred about two years ago at his home neak Barlow. He owned a large o ange grove, and Francis A. Johnson was in his employ in the capacity of overseer or ear superintendent of the orchard. There had been some into the contact. There had been some into the contact. There had been some into the trouble between Newcastle and his wife, and as Johnson was on very intimate terms with her it was generally believed that he was the instigator of It. Mat per came to such a pass that it became evident that cither Johnson or Newcastle would have to leave. It was on a Sunday afternoon that Newcastle and his wife again hat a little quarrel. In the evening Johnson claimed he heard Mrs. Newcastle scream, as if she were boung burt. Rushing into the kitchen, he got a double-barreled shotgun, came back to the room, and shot Newcastle, killing him outging.

A Quick Cahl-gram-The Portai's Progress-The

Western Union Officials.

The Profile Postal people were congrainlating themselves vesterday on their luck; move in getting their northern line up so many hours before the Western Union's were in shape again. Both limes we shadly down, but by sending a man out from each end of the broken point, they were soon in shape and handling the business. The Postal company's business is increasing on the Sound route, and instruments are already on the way and wires run for quadruplexing one wire to Tacoma and duplexing from there on to Seattle. This will increase their facilities to Tacoma four-fold, and double them between here and Seattle.

Manager Thomas of the Western Union called & rephrier's atten ion resterday to the quick time made by a cable message to Hong Kong and back. The message was in cipher and left here about? Solock in the evening, soling across the continent to New York, thence by cable to London, across the continent and Asia Misur, through Bombay and Sipapore to Nokhama. The recipient at Hong Kong couldn't find his cipher key, it seems, and siter looking for it in vain, though the expense wis \$2.77 per word, he had to wire back for a translation. It is not known how much time he spent in his a treb, but early the next morning list cript was received here. The next morning list cript was received here.

"Speaking about competing lines," said a business man yesterday, how would it work for the Postal to run a l'ne into Spokana, building from Pendleton to Walls Walls? Then if one line was down, the other could still do business."

Messre Dickey and Korty, the Western Union officials, did not stop in Fortland long enough to pay their respects to anybody. Coming in on the delayed Northern they had barely time to catch the Short Line for Omaha.

SHOOTING SCRAPE AT ASTORIA. Pat O'Brien Seriously if Not Fatally Injured Last Sunday.

Joseph Soundry.

Joseph fellow, was the restonact "he work forther me any more." Farther on isy the body of one Pat O Brien, a well known character, whom investigation showed to be badly wounded. One bullet had eut red his side and passed through his body; another had struck him in the upper right side of the breast, and passed out near his shoulder place, a bird, in the small of the back, was imbedded in his body, apparently in the region of the bridneys. A fourth had missed its alm and was in the jamb of a door adjacent. The wounded man was picked up and saked who hit him; he could only gurgle out something that sounded like "chief," and sank apparently lifeces. He was at once conveyed to the hospital. It was the opinopportunity to see something of the working of the Atorage batter; system, which is the ideal power for running street cars, but which, it is the relationed by some, is not purfected yet and is impracticable for running cars on account of its greatenes. O hers, however, maintain that it is perfected enough for all practical purposes, and is being used satisfactorly in New York. If this plan is ever adopted for street cars, it will do away with all overhead wires, which are such a bugbear to some. THE CABLE EOAD COMPANY.

Bhowing—Other Work.

The survey of the mouth of the Columbia ordered by the chief of engineers was completed some time since, under the direction of Major T. H Handbury, United States ongineers, and the anotes are now being worked up in his office Following is an extract from his report to the chief of engineers in regard to the matter:

Very great changes have taken place on the bartines the survey of 1885. At that date the extent of creat between the crossing of the same curve on the north and the crossing of the same curve on the south was about one and one-fourth miles. Now this distance is five miles, the middle sands having been entirely washed away. In other words, in 1885 ressels crossing the bar had a vidit of channel of one and one-fourth miles, now they have equally good water for five miles. There has been a gain also of a valiable channel dapth of from one to two feet. The indications are that the best water will be found directly out over the middle of the bar. The jetty undoubtedly is producing this result. I have every confidence that after the next June rise of the river a well-defined channel of at least twenty-six feet at low water will be developed.

This may be considered a very satisfactory howing, when it is remombered that there was no food in the Columbia last year, and therefore the fetty did not produce so much change as it otherwise might.

the world lady champion, Helen Baldwin, of New York, and Kittle O Brien, a daughter of Frin's fair soil, opened at the Mcchanic pavilion at 8 o'clock last night. The contestants rode around that track was a caution to those used to riding by stage coach. The endurance of these riders, who have compated in races in nearly all of the larger cities in the United States, is wonderful. First one would take the lead and then of the larger cities in the United States, is wonderful. First one would take the lead and then another, the andlence giving vent to their feelings by cheers and enthuisastic applause as their favorite passed the others in the race. The riders made good time. At the end of the three hours made good the states of the large that the following the race was alread, Miss Baidwin only a foot or two beatind, and Jessic Cais third. The distance was forty-its miles and ten laps on a four-leen lap track. What pleased the spectators most was the repeated spuris made by the riders to obtain the lead.

During ine riding, the band in the music stand discoursed excellent selections, and Keenedy, the Colorado champion, and Nasber Willie Mulifgan and on the single wheel were performed what the greatest case.

To-night the same riders will again ride steadily for three hours. Trick 'cycling will also be given, and Wednesday evening. In addition to the regular three-hour ride, there will be a boys' contest for silver medals. Thursday ovening a polocible will be organized at the pavilion, and all interested in this sport intending to join will be given admission ticketa.

A Discrepancy in the City's Cash Account-The Proposed Holladay Lvenue Saloon-Miscallaneous East blde Happenings.

There was a regular meeting of the common council last night, with Mayor Stewart in the chair and a quorum of councilmen present. The mayor submitted two yets messages, which are given below with his reasons therefor:

given below with his reasons therefor:

VETO MASSAGE.

Genticizen of the Common Council: I return without my approval an ordinance entitled "An ordinance to provide for the time and, manner of improving Hassalo street, from the north line of Third'street, in McMillon's addition, to the west line of Eleventh street." passed by your honorable hody, November 4, 1889. I find upon examination of the notice published for said improvement that there are some technical defects in the same. Ead of notice reads that it is proposed to improve said street from the north line of Third street, and there seems to be a difference of opinion as to the location of said starting point. As such defects are liable to be taken advantage of and as the city has had some castly experience caused by technical errors, I deem it best to return the ordinance without my approval. Respectfully, Veto sustained.

and Seventh to Jofferson streets and still comply with the provisions of the ordinance by connecting with the provisions of the ordinance by connecting with the Jofferson street ferry. This ordinance as reported and recommended to the connection of the armings to the city, and it was successfully argued signata said clause that the company would be at great expense in building their roadway slong. Man Seventh streets, siso in the purchasing of right of way through property owned by Mrs. Hawthorne. As the ordinance now stands, the company is not required to prey a portion of its receipts to the city as proposed, and can avoid the other expense by forestally claused the right of way along said A and Seventh streets. Presuming it was the intention of the connect to exact one of the above requirements, I deem less to reduce the safety and the arms. Vecto turished.

Inther consideration. Respect ally.

He held that the wridence proved nothing beyond the fact that busband and wife were constantly quarreling with one another, and it was a standoff in regard to who was to blame. The court stated:

stated:
"These parties were first married about twelve years ago, and in March, 1888, obtained a divorce. A few months later they romarried, and now they ask for another divorce. This court will not allow them to experiment in domestic matters so triflingly, and unless they show better coasons, than so far presented, no docree will be granted." With these remarks Judge Steurns threw the case out of court.
